

- ResWare™ is an all-in-one application; it is not made up of modules. Users of ResWare™ can decide what best fits their business model and can build in efficiency as part of a "continuous improvement process" over months and years and continues to increase their efficiency, speed, and profitability. There are many unmatched features and options one may choose from and can do so at their own pace. Aside from fees charged by integrated partners directly, Adeptive does not charge transaction fees.

- ResWare™ is unmatched in the industry for scalability and robustness. It has been tested by a third-party with a unit testing system, LoadRunner™, to show that hundreds of thousands of orders can be added per month with no significant decrease in response time and performance. There is no other commercially-available title production software system that has been proven to be able to handle the volume that ResWare™ can handle. From eight to 1280 users, ResWare™ is scalable, efficient and transformational in the businesses that implement and leverage its power.

- ResWare's features are unmatched by any competitive application, including but not limited to:

- Vendor and partner management
- Fee management
- Workflow automation
- Action-List dynamic triggers and dynamic affects
- Microsoft E-mail Exchange integration
- Outgoing Fax technology integration
- Transaction automation
- Full title & escrow production
- Document management
- Paperless drag-and-drop capabilities
- Bar code technology
- Embedded audit tracking
- Receivables, payables
- Point-n-click HUD/HUD-1 changes
- Trust and escrow accounting features

- For the last nine years, ResWare™ has grown to be the market-leading application in the title & escrow industry. Leaders in the industry have recognized ResWare™ as the most feature rich, robust, scalable and powerful application in the industry.

- We have documented cases of DOUBLING productivity with ResWare™.

- ResWare's team and service is unmatched in the industry. Our passion is YOUR success. We grow by referrals from EXISTING happy ResWare™ users and this should tell you something very important about the service one will receive from our team of professionals.
